

Fold horn and glue together, horn goes in this slit on top of cab.

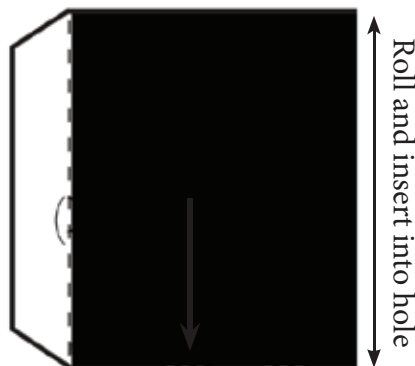

Sand Dome

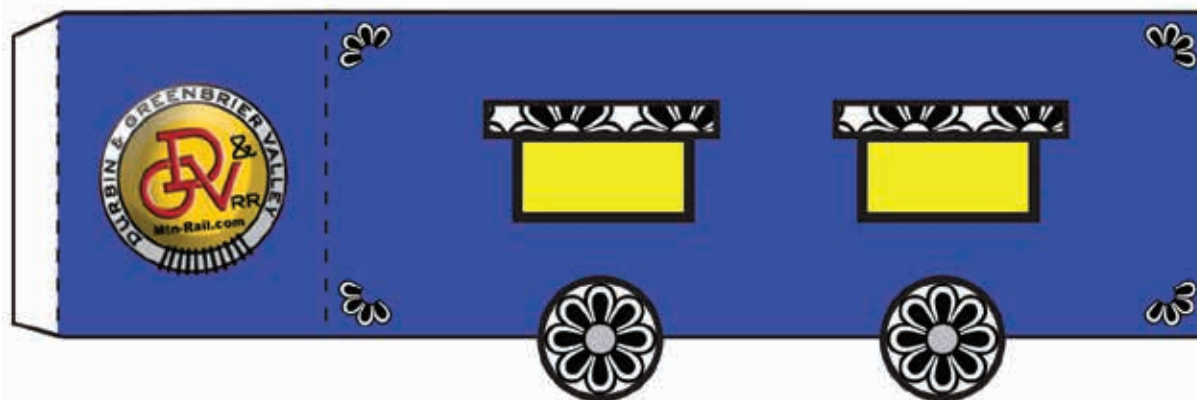

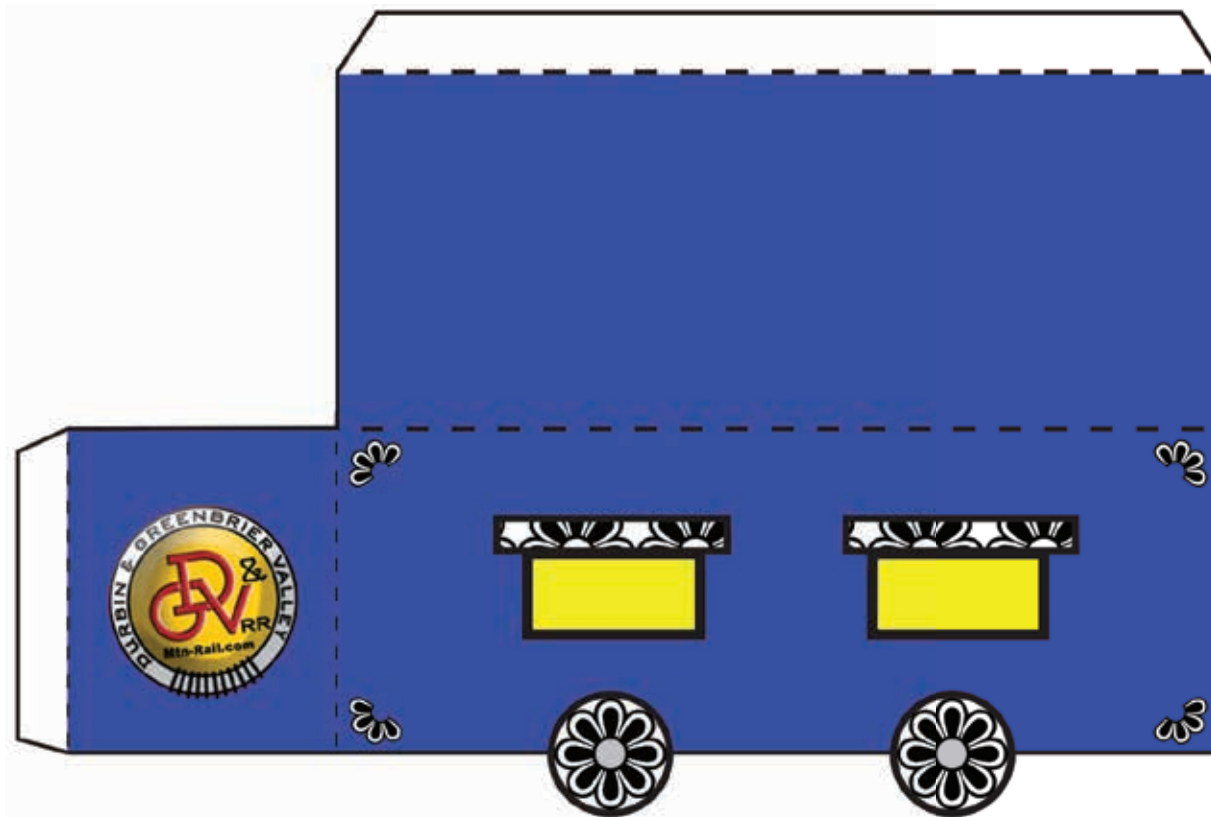

Bell

Engine Chimney Pipe

NOTE: Chimney goes in hole on engine. Behind the chimney is the bell (cut slit) and then the sand dome (cut slit).

Hints:

- First: Cut out train with scissors and fold on dotted lines.
- Using Elmer's glue, attach the longest tab line in each car first. This will make it easier when each piece is dry before continuing. Clear tape makes things easier as well.
- You can use yarn or thread to connect the cars together.
- You can control the size of the train by printing smaller or larger.
